

## **Information Systems**

# C6

A mathematical discipline dealing with characteristics and the transmission of information. Originally applied to communications engineering, it has proved relevant to other fields, including computing. It focuses on such aspects of communication as amount of data, transmission rate, channel capacity, and accuracy of transmission, whether over cables or within society.

She looks calm & quiet, her company makes you feel light and glad. She is a nice person. Anyone can depend on her when the whole world seems topsy-turvy. She gives you a great time whenever she is around. Ask her something and you can never get a negative in return. Her sweet and lovable nature is sure to take her a long way.

The second most difficult thing in this world is to make her talk and the most difficult, of course, is to make her stop. Anything with chocolates, ice creams or cheese would leave her on a perpetual high. Her self-proclaimed sense of humour, her million dollar smile and her natural miming ability are a few facets of her personality. Her mellifluous singing would put any record player to shame. This sincere, fun loving, unassuming Gemini is an indispensable member of Controlz and EDC. She is all set to make a mark in the software field.

To this simple guy, external appearances hardly mean a thing. He is only confined to the insti, his room and the mess (not been to ANC & redi). He is the only source of information regarding courses, exam room numbers and so on. His wingies are so confident with him that they even guss classes. He is a friend, teacher, adviser and so on for his wingies. This guy has never taken a Make-Up until now. His future aim is to do M.S with his money. In the Journey on life's highway, keep your eyes upon the goal. Focus on the donut, not upon the hole. Resolve to be tender with the young, compassionate with the aged, sympathetic with the striving and tolerant of the weak and wrong. Because some time in our lives we would have been all of these ourselves. Nothing great is achieved without enthusiasm. If you think you can or if you think you can't you are right. Our Life is like a ten-speed bicycle. Most of us have gears we never use. Success doesn't mean the absence of failures. It means the attainment of ultimate objectives. It means winning the war, not every battle. Start by doing what is necessary, then what is possible, and suddenly you are doing the impossible.
